

ecoguide

Tour Guide System from Imtradex

The tour guide system, using UHF technology, is the perfect solution for guiding people. E.g. at **facility visits in factories** or at **city tours**, which are normally difficult through **noisy surroundings**.

Because of that high noise level you will need a radio system for your professional presentation.

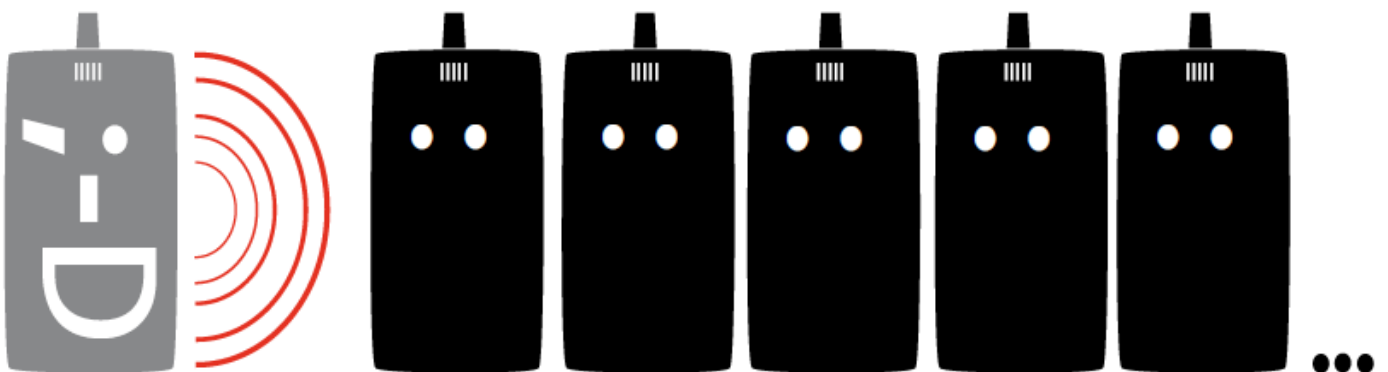

Due to 16 selectable channels, our radio guide system EcoGuide is also the perfect choice for **interpreters** during simultaneous translations at conferences.

We offer our tour guide system EcoGuide for **rental and sale**.

Using our tour guide system
the guides voice will always
be transmitted in crystal clear quality.

Functionality

- 16 channels selectable (using UHF technology)
- any number of receivers possible
- system can be operated by batteries or accumulators
- with noise cancelling microphone, thus clear understandability also under noisy conditions
- sanitary, monaural and light-weight earphone (other earphones optionally deliverable)
- feather-light and compact, robust and tough yet
- easy to use
- no registration required, feeless in Europe

Transceiver

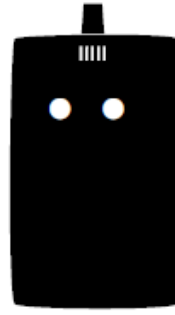

Hand microphone with built in transceiver

Pocket transceiver

- including built-in microphone and external microphone jack (various microphones deliverable)
- AUX-IN jack for MP3 players to loop in precasted audio files
- including sensitivity controller for the microphone
- with belt clip

Optional

- different types of headsets
- clip microphone
- cords

Receiver

Pocket receiver

- 3,5 mm earphone jack for best audio quality
- different earphone types available
- volume control
- AUX-OUT jack to transmit signal to loudspeakers
- with belt clip

Optional

- Different types of earphones
- cords

Area of application

In noisy surroundings, production sheds, during conferences, in museums, exhibitions, sports training, driving school, sightseeing tours, or during events for translators:
You will understand every single word. Our wireless tour guide system EcoGuide guarantees a perfect verbal communication for many uses:

- Company or plant visits also under very noisy conditions
- Machine and product presentations
- Multilingual guidances, trainings, press conferences and congresses
- Simultaneous translations
- Trainings and instructions at noisy workplaces
- Directions during sport events, e.g. equestrianism, skiing schools, etc.
- Guidances during exhibitions and in museums
